

Site Evaluation

Module Perspective

1. What is the topic?
2. Who is (are) the audience(s)?
3. What is the course goal?
4. What are the learning objectives?
5. What are you trying to cover?
6. How do you plan to do this?
 1. The topic for this course module is Surface site characterization for the feasibility and placement of onsite wastewater treatment and disposal systems.
 2. The target audience includes senior-level and graduate environmental engineering and environmental science students.
 3. To teach students the methodologies for sighting an onsite wastewater treatment and disposal system.
 4. After the course, the students will know preliminary information that is often available and useful, type of equipment that should be used in the field while performing a site investigation, and items to look for and to avoid when locating an onsite wastewater treatment and disposal system.
 5. Site investigation techniques and equipment used to determine the feasibility and location of an onsite wastewater treatment and disposal system.
 6. This course module includes a use of PowerPoint presentations, graphics, text, and design examples.
